# Product Options

Crown USA Inc. can meet customer needs by offering a full line of federal specification paint products as well as specialty modifications.

## TT-P-1952F

### Type I – Standard Dry

- Low VOC Formula
- Non-flammable, Non-bleeding
- Lead and chromate free

### Type II – Fast Dry

- Excellent glass bead retention
- Will dry under high humidity conditions
- Recommended for seal coated surfaces, airfields, and highways

### Type III – High Build

- Excellent initial and long-term retro reflectivity (works best with big beads)
- Can be applied with standard waterborne striping equipment with no modifications
- Can be applied at films up to 30 mils wet without cracking

## Specialty Modifications

### Algae Resistance

- Algae resistance is built into the formulation of the paint (one part product)
- Available in Type I, II, and III

### Stain Resistance

- Stain resistance is built into the formulation of the paint (one part product)
- Sealed finish for stain and discoloration resistance
- Available in Type I, II, and III

**Crown offers Algae Resistance and Stain Resistance together in the same product.**

\*Available in Type I, II, and III
